## Using Clorox Bleach for Disinfecting COVID-19

HEALTH & SAFETY FACTSHEET

**Do not mix with anything but water.**

**If using something other than these Clorox products, consult their SDS and labels for product guidance and effectiveness.**

### Clorox® Disinfecting Wipes

- Wipe surface to be disinfected.
- Keep surface wet for 4 minutes.
- Let surface dry.
- For highly soiled surfaces, clean excess dirt first.
- For items that come in contact with food or mouths (like baby bottles or toys), rinse with warm water and let air-dry

### Clorox® Clean-Up Cleaner + Bleach

- For heavily soiled surfaces, pre-clean surface before disinfecting.
- Spray 6 to 8 inches from surface and allow product to penetrate tough stains and messes.
- Let stand 30 seconds.
- Wipe with a wet sponge or cloth and rinse with water, no scrubbing required.
- For items that come in contact with food or mouths rinse with warm water and let air-dry.

Use Personal Protective Equipment as directed by the label and Safety Data Sheet.

The products listed here have demonstrated effectiveness against viruses similar to COVID-19 on hard, nonporous surfaces. Because of the EPA's Emerging Pathogen Policy, these products can be used against COVID-19 when used as directed.
