

ARPA EXCEPTIONAL LEADERSHIP AWARD 2023

22 JUNE 2023

AMANDA MCGENNIS, ARIZONA CHAPTER – AGC

ARPA strives to develop key relationships with federal, state and local agency staff, elected officials, and the key individuals outside our Association in order to sustain a positive perception of the industry. ARPA would like to recognize people who have been supportive of this objective and helpful in reaching the goals of the Association for many years and have gone somewhat unrecognized for their “all hands-on deck” efforts. These people exemplify how much this sector truly cares about Arizona.

This year’s ARPA Exceptional Leadership Award goes to Amanda McGennis, who served the Associated General Contractors for over 22 years. In that capacity, Mandee served on the joint Asphalt Technical Committee addressing technical needs of both association’s members. Mandee and ARPA staff have worked together on countless technical issues, air quality matters, and political and regulatory issues. You could not ask for a more loyal and stalwart defender of the industry. Her technical expertise and command of the issues are second to none. Her extreme work ethic and dedication delivered value for her members and therefore our members, her efforts are greatly appreciated by this Association, and we are truly indebted.
