## **Check Sheet**

### **ARPA Environmental Leadership Award Program**

**2024**

The ARPA Environmental Leadership Award Program honors excellence in environmental innovation and industry management practices that exceed compliance standards and positively influence public perception of the aggregates industry.

ARPA strongly believes that proactive environmental management is one of the most effective ways for aggregate producers to show that their operations are valuable assets to any community. It also demonstrates that those who manage and work at these operations are good neighbors, committed environmental stewards, and responsible corporate citizens.

The primary goal of the ARPA Environmental Leadership Award Program is to recognize professionals who go the extra mile every day to improve public perception of local aggregate operations and the mining industry as a whole. This is achieved by fostering positive public engagement and acknowledging those who contribute to this important effort.

Please send filled submittal packet to:  
E-mail: [ninel@azrockproducts.org](mailto:ninel@azrockproducts.org)
