# Certificate of Conformance for Concrete Production Facilities

It is hereby certified that

Sunshine Redi-Mix, Plant - Glendale 5725 N. 55th Avenue, Glendale, AZ 85301

has been inspected by the undersigned registered professional engineer for conformance with requirements of the "Check List for Ready Mixed Concrete Production Facilities." As of the inspection date, the facilities met requirements as stated below.

Operation: **Truck Mixing** Batching System: **Manual** 

Recording: Cementitious, Aggregate, Water, Admixture

**Executive Director** 

Arizona Rock Products Association

11/04/2021
Date signed by ARPA Executive Director

10/20/2021

Inspection Date

10/20/2023

**Expiration Date** 

This Company will maintain these facilities in compliance with the Check List requirements and will correct promptly any deficiencies which develop.

Notice: The check list indicates only that plant facilities are satisfactory for the production of concrete when properly operated. Conformance of the concrete itself with specification requirements must be verified by usual inspection methods in accordance with sales agreement.

## 11. CONCRETE BATCH PLANT INSPECTION REPORT

Re	ady Mix Supplier:	Sunshine Redi-Mx	Date	10/20/20	121	
Plant number: Glendale Plant		Project Name: 2021 ARPA Plant Inspection				
Pla	nt Location:	5725 N. 55th Avenue, Glendale	Project Number	2125522	'A	
Ins	spector:	Donald L. Cornelison	Lab Number

### TICKETING SYSTEM

			Not
a. Ready-Mix Concrete Company's Name b. Plant number or designation c. Ticket Serial Number	ACCEPTABLE  X X X	ACCEPTABLE	APPLICABLE
<ul> <li>d. Truck Number or designation</li> <li>e. Purchaser Name</li> <li>f. Job name and location</li> <li>g. Specific class or designation of concrete mix</li> <li>h. Batch size in cubic yard or meters</li> <li>i. Date and time when batch was loaded</li> <li>J. Type and name of specialty admixture or ingredient and amount batched</li> <li>k. Place where extra water added at request of receiver of the concrete and his signature or initials.</li> </ul>	X X X X		

The referenced plant satisfies the indicated criteria and is capable of producing acceptable concrete. Yes 🗵 No 🔲

### Notes:

- 1. Items 1a and 1b evaluated as follows: Aggregate stockpiles located to prevent contamination and arranged to assure that each aggregate as removed from its stockpile is distinct and not intermingled with others. Separate storage bins or compartments for each size and type of aggregate properly constructed and charges to prevent mixing of different sizes or types. Aggregates meet applicable specifications.
- 2. For information only; this item not required for approval of plant.
- 3. Applicable tolerances are consistent with information contained in the latest edition of ASTM C 94 Standard Specifications for Ready Mixed Concrete.

### **Definitions:**

Manual Systems - Batching devices are operated manually. Individual batch target weights, moisture adjustments, and volumetric measuring systems are manually determined and verified by the batch operator. Discharge of the batch is performed manually by the batch operator. These systems are typically assisted by pneumatic, electric or hydraulic power, but may be hand operated.

**Semi-Automated Systems** - These systems provide mechanisms that start the weighing and volumetric measuring devices for the batch. These systems will stop the weighing and measuring upon attaining the required batch tolerances. Discharge of the batch may be automated upon attaining acceptable batch tolerances, or may be performed manually. These systems may or may not include interlocking mechanisms for out of tolerance batches.

Fully Automated Systems - A single starting mechanism provides target weights and volumes, begins the weighing and measuring process and ends this process when the targeted batch proportions are within tolerance. Out of tolerance batches must be manually adjusted to within tolerance and/or accepted by the batch operator. Once the batch tolerances are met or manually accepted, discharge of the batch will begin automatically.

# 12. Verification of Inspection and Application for Certification (CONTINUED)

The undersigned, a registered professional engineer in			Arizona			
	(state, territory, or jurisdiction)			isdiction)		
has conducted th	has conducted the inspection of the ready-mixed concrete plant described as					
	Glendale Plan	t, 5725 N. 5	5th Avenue - Glen	dale, AZ		
	(please p	orint specific d	esignation and location	on of plant)		
	s professional judgment eby made for the issual				accurate and complete. d as follows:
