RE: ARPA Adopts the Job Safe Program

ARPA Members:

The Arizona Rock Products Association (ARPA) is proud to announce that the ARPA Safety Committee and Board of Directors supports and endorses the Job Safe program. As a result of this program, ARPA believes that safety awareness regarding rock product deliveries will be increased and jobsite conditions greatly improved.

It is no longer an acceptable practice for anyone to place workers or trucks in situations where accidents may occur. The Association is committed to addressing situations where ground conditions are poor, there is a need to keep mixer trucks a safe distance from an excavation or there is an opportunity to provide level access roads to increase safety for product delivery to minimize damage and risk.

The Job Safe mission is to *“develop a culture of change through an elite partnership between ready mix producers, industry associations and the construction: Industry by focusing on jobsite safety”*. The program has established guidelines to assist with jobsite safety through education, awareness, and communication and is available to all association members upon request and at no cost.

Collectively with our industry partners in construction we can address this key challenge. As a result of the Job Safe program our valued customers will be better informed concerning risks, understanding vehicle weights and dimensions, proper signaling and what will be expected from them for safe delivery of Rock Products. Once again, ARPA members have this unique opportunity to utilize the program at no cost or obligation to them and we are affirmed will immediately see the benefits of a thoughtful approach to safe product delivery.
