

ARPA ASSOCIATE OF THE YEAR AWARD 2026

REUTER EQUIPMENT & FABRICATION

This award is given to an associate member that is a prominent leader in the Association and supports all aspects of what ARPA does. They are extremely involved, contribute to our mission and help to fulfill the strategic planning obligations.

For more than 30 years, **Reuter Equipment & Fabrication** has gone above and beyond in supporting ARPA's mission and members. Their commitment to the association is reflected not only in their participation, but in their willingness to lead, engage, and advocate for the success of the aggregate industry. Reuter has been a stalwart member since the 1970's! Carol Hansen, our Board Members, has been a tireless advocate for the industry, always engaged, always dependable, and always looking out for the best interests of ARPA and its members. Her leadership, along with the support of the entire Reuter Equipment team, has played a vital role in strengthening our association. She has been a huge supporter of our Future Leaders Program. Brad Cable was in our first Future Leader class and designed and built the gabion in the ARPA lobby.
